

Update for **BlackRock Combined Property Income Fund (Aust), BlackRock Direct Property Fund (Aust) and BlackRock Direct Real Estate Fund (Aust)** Product Disclosure Statements

Issued by BlackRock Investment Management (Australia) Limited ABN 13 006 165 975
Australian Financial Services Licence No 230523

BLACKROCK

Dated 30 September 2010

This notice updates the information contained in the **BlackRock Combined Property Income Fund (Aust) (Class C Units) PDS dated 28 April 2008, BlackRock Combined Property Income Fund (Aust) (Class D Units) PDS dated 28 April 2008, BlackRock Direct Property Fund (Aust) (Class C Units) PDS dated 6 June 2006, BlackRock Direct Property Fund (Aust) (Class E Units) Disclosure Document dated 20 October 2005, the BlackRock Direct Real Estate Fund (Class A and B Units) PDS dated 16 May 2007.**

Each of the abovementioned funds ('the Funds') invest in the BlackRock Property Trust (Aust) ("Property Trust") to achieve their investment strategy in direct property and unlisted property securities.

The BlackRock Property Trust (Aust) and each of the above mentioned Funds are currently "non-liquid" (as defined in the Corporations Act 2001).

While the Funds are "non-liquid" investors are only able to withdraw from the Funds if we make a Withdrawal Offer in accordance with the Constitution of the Funds and the Corporations Act.

There have been no material changes to the following disclosure principle information since the previous PDS Update.

Gearing/Borrowings

Gearing, also known as borrowing, may be undertaken by the BlackRock Property Trust (Aust) ("Property Trust") for transactional and strategic purposes when we consider it to be in the best interests of unitholders.

The Gearing Ratio is the Property Trust's total interest bearing liabilities divided by the total assets of the Property Trust. A higher gearing ratio means a higher reliance on external liabilities (primarily borrowings) to fund assets.

The Gearing Ratio indicates the potential risks the Property Trust faces in terms of its level of borrowings due to, for example, an increase in interest rates or a reduction in property values.

The Gearing Ratio for the Property Trust was 28.6% at 30 September 2010.

Scheme Borrowings

The Property Trust implements gearing strategies (ie borrows) for both transactional and strategic purposes. In these circumstances, the Funds will be exposed to interest rate movements on any cash or borrowings the Property Trust holds. Increases in interest rates could have the effect of reducing the availability or increasing the cost of finance for the Property Trust which may impact upon income distributions and the market value of investments held by the Funds. Funding may be raised through various borrowing facilities on commercial terms.

The Property Trust currently has a portfolio level debt facility of \$170m with Westpac Banking Corporation, maturing in June 2012. At 30 September 2010, \$138.5m of the facility was drawn with \$31.5m undrawn.

The repayment of amounts owing to lenders and other creditors of the Property Trust rank in priority to an investor's interest.

Interest Cover

Interest cover refers to the ability of the Property Trust to meet interest obligations on outstanding debt or borrowings. Interest cover is determined by dividing interest payments by income (ie. earnings of the Property Trust before interest and tax). The higher the ratio the better the ability of the Property Trust to meet its interest payments.

At 30 September 2010 the interest cover for the Property Trust was 4.1 times.

Portfolio Diversification

The Funds have exposure to direct property and unlisted property securities through investing in the Property Trust.

The following table contains details of the Property Trust property portfolio as at 30 September 2010. It is not the portfolio of the Funds themselves, but that of the Property Trust into which the Funds invests.

BlackRock Property Trust (Aust) holdings as at 30 September 2010
